Specifications

NWR Model Floor Water Receptacles are 16GA type 300 series stainless steel one-piece construction. Horizontal corners and the trough is creased toward a waste outlet with a stainless steel beehive strainer and a 3" OD tail piece.

Recessed flange and 1" deep ledge for IMC grating are integral with the unit. Unit is 6" wide and 4" deep.

Joints are TIG welded and leak-proof. Exposed surfaces finished brush satin.

NWR banded grating runs lengthwise.

Product Guide

Use for Commercial and Institutional Buildings or large food prep facilities.

Unit is generally used underneath Ice Machines or in front of walk-ins or large water discharge areas, in tight spaces.

Flexible design such as custom depths make this a versatile drain trough.

Recessed flange supports floor tile and provides a grout pocket.

Setting frame for waterproof membrane and/or integral seepage flange with "weep" holes can be added for wet floor areas.
